Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This office action is in response to application filed on January 16, 2001 (Paper No. 1). Original application contained Claims 1-2. Therefore, presently Claims 1-2 are pending for further consideration.

Information Disclosure Statement

The information disclosure statement filed January 16, 2001 (Paper No. 4) fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by Novikov et al. (U.S. Patent 6,282,304).

3. Regarding Claim 1 Novikov teach and describe an access control system, comprising:

- an electronic device adapted for operation using power from a power source, said power source energizing a circuit of said electronic device for enabling a startup procedure of said electronic device; a switch, coupled between said power source and said processor, for enabling said energizing of said circuit responsive to an assertion of an activation signal (col.5 line 6 to col.7 line 16); and

- a biometric reader coupled to said switch, comprising: a memory for storing a biometric signature; a biometric sensor, coupled to said memory, for discerning a biometric profile; and a verifier, coupled to said biometric sensor and to said memory, for asserting said activation signal when said biometric profile matches said biometric signature (col.7 line 17 to col.9 line 27).

4. Regarding Claim 2 Novikov teach and describe a method for controlling access to an electronic device, comprising:

- discerning a biometric profile of a prospective user of the electronic device; comparing said biometric profile to a stored biometric signature of an authorized user of the electronic device; thereafter asserting an activation signal to a switch when said prospective user is an authorized user, said switch interposed between a power source of the electronic device and a circuit of the electronic device for enabling a startup procedure of said electronic device such

Art Unit: 2131

that said switch interrupts power to said circuit when said activation signal is not asserted (col.5 line 25 to line 42, and col.16 line 56 to col.17 line 18).
